

AI AGENT SYSTEMS · CONFIDENTIAL PROPOSAL

Your team gets an *AI team* behind it.

A custom AI agent system built for your team at Phyllis Browning Company — handling content, operations, communications, and daily briefings so your team can focus on clients.

PREPARED FOR
ANDREA WOLLENZIN · PHYLLIS BROWNING COMPANY

Prepared by Ayla Blumberg

THE SITUATION

What your team is *spending time on*

Your team of 8 agents, a Marketing Director, Operations Manager, and Operations Director are collectively spending **hours every week** on work that doesn't require a licensed agent — drafting social posts, chasing timelines, sending internal updates, writing follow-up communications. That's capacity being taken from clients. An AI agent team changes that.

HOW IT WORKS

One Telegram bot. *Four agents behind it.*

Your team talks to one bot in Telegram — like texting. Behind the scenes, four specialized agents divide the work, coordinate, and deliver finished outputs back to you for review before anything goes anywhere.

01 YOU MESSAGE Tell the bot what you need in plain English. "Draft three Instagram posts for our new Alamo Heights listing."	02 AGENTS WORK The right agent picks it up, researches, drafts, and runs it through quality review — all in the background.	03 YOU REVIEW Finished drafts land in Telegram. You edit, approve, or ask for changes. Nothing posts or sends without you.	04 YOU PUBLISH A human on your team hits send. Clients see your brand — not software. Always human-facing.
---	---	--	--

On privacy: The system is designed to be completely invisible to clients. Every output is reviewed and published by a member of your team. There is no AI branding, no automated posting, no client-facing bots. Your brand stays yours.

THE TEAM

Four agents. *Each with a specific job.*

Each agent is named, has a defined role, and owns a specific part of your week. Together they handle the four biggest time drains your team mentioned.

The Content Agent

SOCIAL MEDIA & MARKETING

Takes a simple input — new listing, open house, just-sold, team announcement — and returns platform-ready caption drafts for Instagram, Facebook, and LinkedIn. Written in your team's voice. Ready to review and post.

The Operations Agent

WORKFLOW & TIMELINES FOR DORIAN

Dorian tells it what's on the plate and it builds a structured timeline, flags upcoming deadlines, and tracks what's in progress. Reduces the mental overhead of managing multiple moving deals simultaneously.

The Brief Agent

DAILY MORNING SUMMARY

Delivers a daily brief to Dorian every morning via Telegram — what's happening today, what deadlines are approaching, what's pending review. A clean start to every workday without digging through emails or notes.

The Communications Agent

EMAIL & MESSAGE DRAFTING

Drafts professional follow-up emails, client communications, and internal messages on request. Give it the context and it returns a polished draft in your voice — ready to review and send from your own inbox.

YOUR OPTIONS

Two ways to *get started.*

Choose the level of involvement that makes sense for your team. Both options give you the same core system design — the difference is who builds it.

OPTION A

The Blueprint

\$200 · One-time flat fee

- Complete agent team plan document — all four agents fully designed
- Role definitions, personality prompts, and job scope for each agent
- Pipeline logic and workflow maps showing how agents coordinate
- Integration recommendations for your existing Nanoclave setup
- Step-by-step build guide written for your technical level
- One round of questions answered after delivery

BEST FOR

Teams with existing technical setup who want a proven architecture to build from themselves.

OPTION B

The Full Build

\$3,500 setup · \$400/month · 3-month minimum

- All four agents built, tested, and deployed — ready to use
- Dedicated cloud server setup (third-party costs covered by your team)
- Telegram bot delivered and configured for your team
- Voice training so agents write in your team's tone
- Full QA and pipeline testing before handoff
- Ongoing monthly support and agent refinements
- Setup split: 50% at kickoff · 50% at delivery

BEST FOR

Teams who want it done right and running without lifting a finger.

On the monthly fee: The \$400/month covers ongoing monitoring, prompt refinements as your team's needs evolve, and priority support. After the 3-month minimum, the engagement is month-to-month with 30 days' notice to cancel.

PRICING SUMMARY

OPTION	SETUP	MONTHLY	WHO BUILDS	TIMELINE
The Blueprint	\$200	—	Your team	Delivered in 5 business days
The Full Build	\$3,500	\$400	Ayla Intelligence	Live within 2–3 weeks of kickoff

ABOUT

Who builds this

Ayla Blumberg is a Dallas-based AI builder and content creator who builds custom AI agent systems for businesses. She documents her builds on TikTok (@aylablumberg_realestate) and has a working knowledge of real estate — she passed her Texas Real Estate License exam.

How it's built

All agent systems are built on Nanoclave and powered by Claude Sonnet. Agents communicate via Telegram and are deployed to a dedicated cloud server your team controls. No subscription platforms, no middlemen —

a system your team owns.

Ready to move forward?

Happy to answer any questions from you or your team, hop on a quick call, or get started on whichever option fits best.
